madfu | Business

Madfu Merchant Onboarding

Wireframes · Proposed / Product Design

Source of truth	Wireframe system specification, 15 Oct 2026
Prototype	Merchant Onboarding Lab · Madfu Proposed (39 scenarios, 24 required)
Data	Synthetic. Integrations are simulated. Not production behaviour.

Proposed / Product Design

Principles

1. **Ask only what is needed now.** Retrieve everything else from verified sources.
2. **Eligibility first.** Revenue routing and category screening happen before any paid verification.
3. **Application, not account.** Applicants work on an application; the merchant account and password are set up only after approval.
4. **Identity before mobile.** CR / National ID duplicates are detected first; reusing a mobile never rejects on its own.
5. **Backend-first verification.** No proof of sales, VAT certificate, ID upload, IBAN certificate, beneficiary or SWIFT.
6. **Nafath is identity, not signature.** The agreement is a separate step, available only after Nafath verification.
7. **Freelancers self-onboard at every revenue level.** Registered businesses below SAR 100K or above SAR 20M become Sales leads.
8. **Clear, recoverable states.** Back, Edit, resume and bounded retries; internal reasons are never shown to applicants.

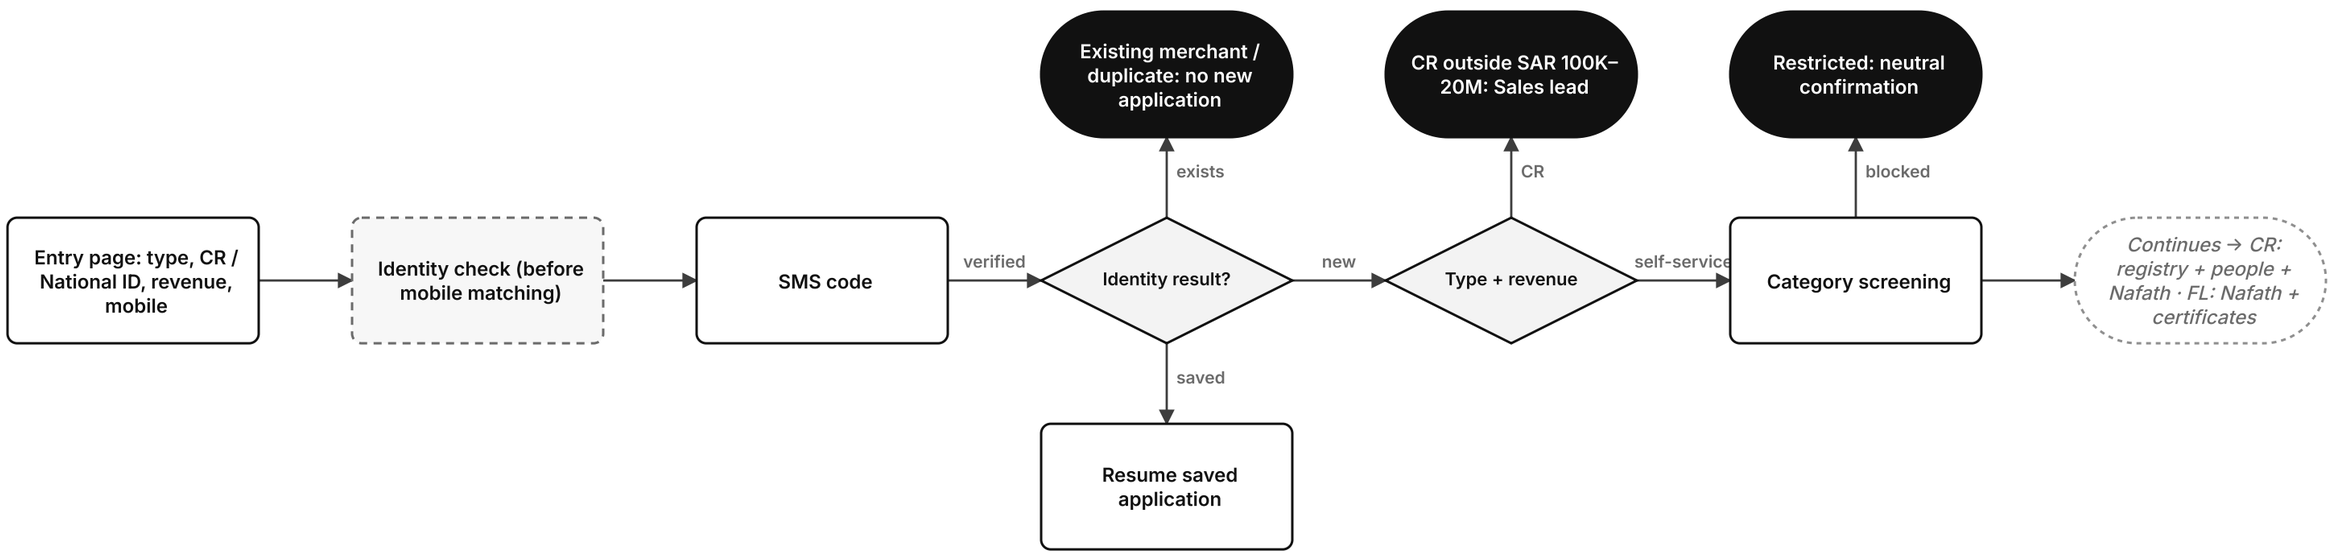

Proposed / Product Design

Overview

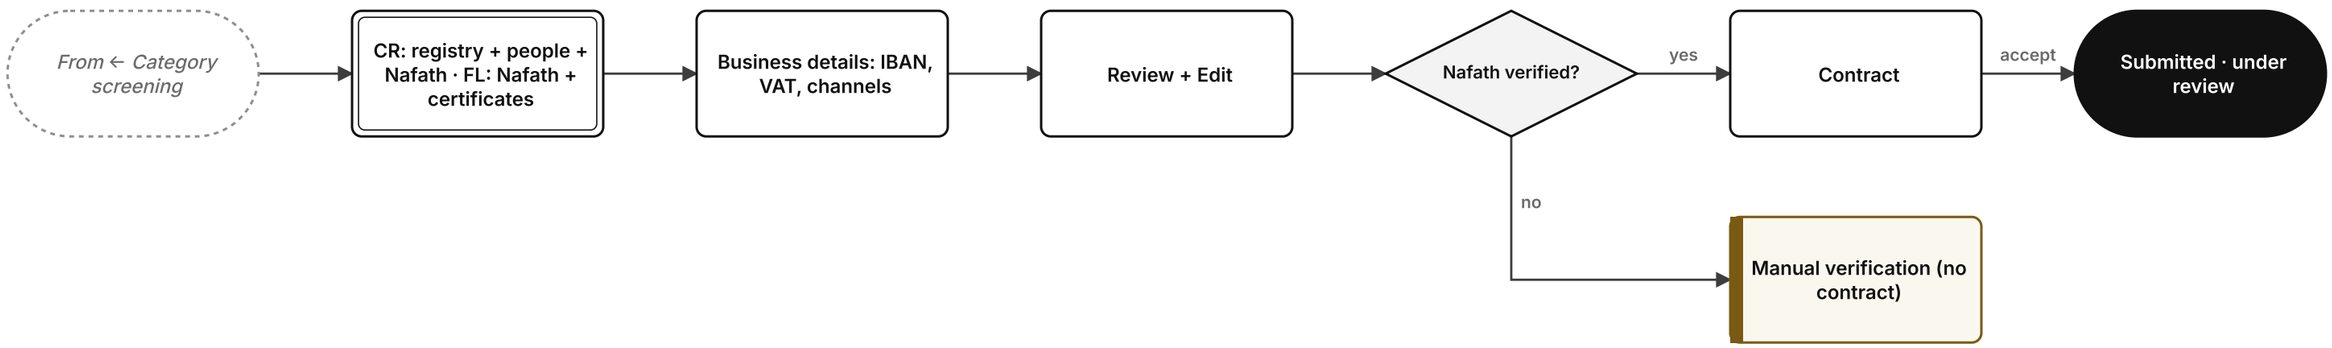

One entry page for both applicant types. Identity is checked before the mobile; routing happens only after the SMS code.

User screen · Decision · Backend check · External verification · Manual route · Outcome · Fallback / loop

Overview (part 1 of 2)

Overview (part 2 of 2)

Proposed / Product Design

Entry page

One page for both applicant types. All fields are mandatory; validation is structural only.

DECISION TABLES

Proposed / Product Design

Revenue routing (after a successful SMS code)

Applicant	Annual revenue	Route
Registered business	Below SAR 100,000	Sales lead (no onboarding)
Registered business	SAR 100,000–20,000,000	Self-onboarding
Registered business	Above SAR 20,000,000	Sales lead (no onboarding)
Freelancer	Below SAR 100,000	Self-onboarding
Freelancer	SAR 100,000–20,000,000	Self-onboarding
Freelancer	Above SAR 20,000,000	Self-onboarding

Provisional boundary: exactly SAR 100,000 is treated as self-onboarding (configurable).

Proposed / Product Design

Existing and duplicate checks (order)

Order	Check	If true
1	CR (or National ID) belongs to an existing merchant account	Stop: "already has a Madfu account"; no new application
2	An application exists for this CR / National ID with the same mobile	Resume the saved application after the SMS code
3	An application exists for this CR / National ID with another mobile	Stop: duplicate identity; no new application
4	Existing Freelancer adds another certificate	Future account flow (not designed)
5	Mobile number already used with another CR or person	Not a reason to reject: same mobile may belong to several businesses

Proposed / Product Design

Category screening (fixture catalogue)

Madfu subcategory	Classification	Registered business	Freelancer

Fixture examples (demo classifications) › Example: CR-only subcategory	cr only	Continue	Continue; flag CR-only category
Fixture examples (demo classifications) › Example: manual business review	manual review	Continue; flag business review	Continue; flag business review
Fixture examples (demo classifications) › Example: restricted subcategory	blocked	Neutral confirmation; no paid checks	Neutral confirmation; no paid checks

Fixture values: the real Madfu catalogue and restrictions are pending.

Proposed / Product Design

CR verification results

Result	Behaviour
Valid	Continue to authorised people
Expired	Continue; flagged internally for review
Not found / invalid	Cannot continue; applicant can edit the CR number
Provider unavailable	Retry (bounded, 2 retries); progress kept; no people invented
Unexpected error	Retry; progress kept

Proposed / Product Design

Nafath (identity and authority, not the contract)

Situation	Registered business	Freelancer
Attempts	2 per application, shared across people	2 per application
Changing the selected person	Does not reset the counter	—
First failure (rejected / timeout)	Retry same person, or choose another; remaining attempts shown	Retry; remaining attempts shown
Second failure	No more automatic Nafath; unverified; business data still collected; no contract	Manual route: certificate number by hand, IBAN without ownership check, no contract
Technical failure	Does not use an attempt (provisional)	Does not use an attempt (provisional)
Verified	Continue to business details	Retrieve freelance certificates

Proposed / Product Design

Freelance certificates

Result	Behaviour
One	Preselected; confirm
Several	Choose one
None	No certificate invented; type the number (manual verification)
Provider unavailable	Retry, then type the number
Expired	Shown, cannot be selected
Already attached to another account	Shown, cannot be selected
Inconsistent data	Selectable; flagged
Activity differs from chosen category	Flagged; restriction re-evaluated (restricted → neutral confirmation)

Proposed / Product Design

IBAN ownership

Applicant	Checked against	After 2 unsuccessful checks
Registered business	The business (CR)	Continue; unverified; manual financial review
Freelancer, Nafath verified	The individual	Continue; unverified; manual financial review
Freelancer, Nafath failed	Not checked	Collected for manual verification

DECISION TABLES

Proposed / Product Design

Contract eligibility (computed from the prototype rule)

Applicant	Situation	Contract
Registered business	Nafath verified, IBAN verified	Contract available
Registered business	Nafath verified, IBAN unverified after 2 checks	Contract available
Registered business	Nafath verified, CR expired (flag)	Contract available
Registered business	Nafath failed twice	No contract: manual verification
Registered business	No eligible individual	No contract: manual verification
Freelancer	Nafath verified, certificate selected	Contract available
Freelancer	Nafath verified, certificate typed by hand	No contract: manual verification
Freelancer	Nafath failed twice	No contract: manual verification

Proposed / Product Design

Outcomes: external copy vs internal status

Applicant sees	Internal status
Your application has been submitted successfully.	Submitted · under review
We have received your application.	Submitted · manual verification
Thank you for your interest in Madfu. Our team will contact you.	Sales lead · CR below SAR 100K
Thank you for your interest in Madfu. Our team will contact you.	Category restricted · neutral review
This business already has a Madfu account.	Existing merchant · no new application
An application already exists for these details.	Duplicate identity · no new application
You already have a Madfu account.	Existing Freelancer · additional certificate (future account flow)
You declined the agreement.	Contract declined · not submitted

Proposed / Product Design

Global UX handover note

> All screens require complete UX/UI validation, error-state, empty-state, loading-state, retry, and edge-case designs. The absence of a specific state from the wireframes does not mean it is excluded from the final product requirements. The UX/UI team is responsible for designing comprehensive error and validation experiences for every field, step, and integration.

These wireframes show structure, content and behaviour. Visual design, motion, Arabic / RTL and accessibility are for the UX/UI team to complete.

Proposed / Product Design

Assumptions and pending decisions

Assumptions in the prototype

- Application and merchant account are separate: no login or password exists during onboarding; the account is set up after approval.
- SMS code: 3 incorrect attempts, then a new code is needed; expiry and resend are simulated.
- Identity and duplicate checks run before mobile matching; the outcome is shown only after the SMS code.
- Nafath verifies identity and authority; it is not the contract signature.
- Expired CR is allowed to progress and is flagged for review.
- IBAN is the only bank input; bank name is derived; SWIFT, beneficiary and IBAN certificate are never asked.
- Branch count is optional and only asked for offline or mixed sellers.
- No Source of Revenue / Source of Income, no Proof of Sales, no VAT certificate, no document uploads.

Pending product decisions

1. Exact revenue boundary: is SAR 100,000 self-onboarding or a lead? (prototype: self-onboarding)
2. Real Madfu category catalogue, its restrictions and CR-only list (prototype uses fixtures).
3. Provider behind CR enrichment / verification and associated parties (prototype: neutral mock adapter).
4. Provider behind IBAN ownership verification for businesses and individuals.
5. Contract / e-signature provider and legal acceptance method (prototype: generic simulated acceptance).
6. Whether a Nafath technical failure consumes one of the two attempts (prototype: it does not).
7. Whether editing the IBAN resets the two-check limit (prototype: the limit is per application).
8. VAT for registered businesses when no VAT record is found (prototype: VAT is retrieved; Freelancers type the number).
9. Freelancer with no certificate found: allow contract after manual certificate verification? (prototype: no contract, manual verification).
10. Existing Freelancer adding another certificate: future account flow to be designed.
