madfu | Business

Madfu Merchant Onboarding

Wireframes · Proposed / Product Design

Source of truth	KYB-first journey update, 23 Oct 2026 (supersedes the 15 Oct wireframe specification where they differ)
Prototype	Merchant Onboarding Lab · Madfu Proposed (70 scenarios, 60 required)
Data	Synthetic. Integrations are simulated. Not production behaviour.

Proposed / Product Design

Principles

1. **Ask cheaply first, verify expensively later.** Know Your Business decides eligibility before any CR, ID, mobile, OTP or paid check.
2. **Never ask twice.** Stage-1 answers are linked to the application after OTP and shown, not re-asked.
3. **Never repeat a paid verification unnecessarily.** Successful checks are reused until their dependent data changes; resume normally costs one OTP.
4. **Do not lose a valid lead.** Freelancers without a certificate and out-of-band registered businesses become leads; a missing bank link becomes a follow-up.
5. **Application, not account.** The merchant account is set up only after approval.
6. **Commercial terms before the contract.** Commission and payment plans are chosen in the Commercial Offer; the Contract only shows them.
7. **Internal reasons stay internal.** Applicants see clean, generic outcomes; reason codes and flags are for the team.

JOURNEY OVERVIEW

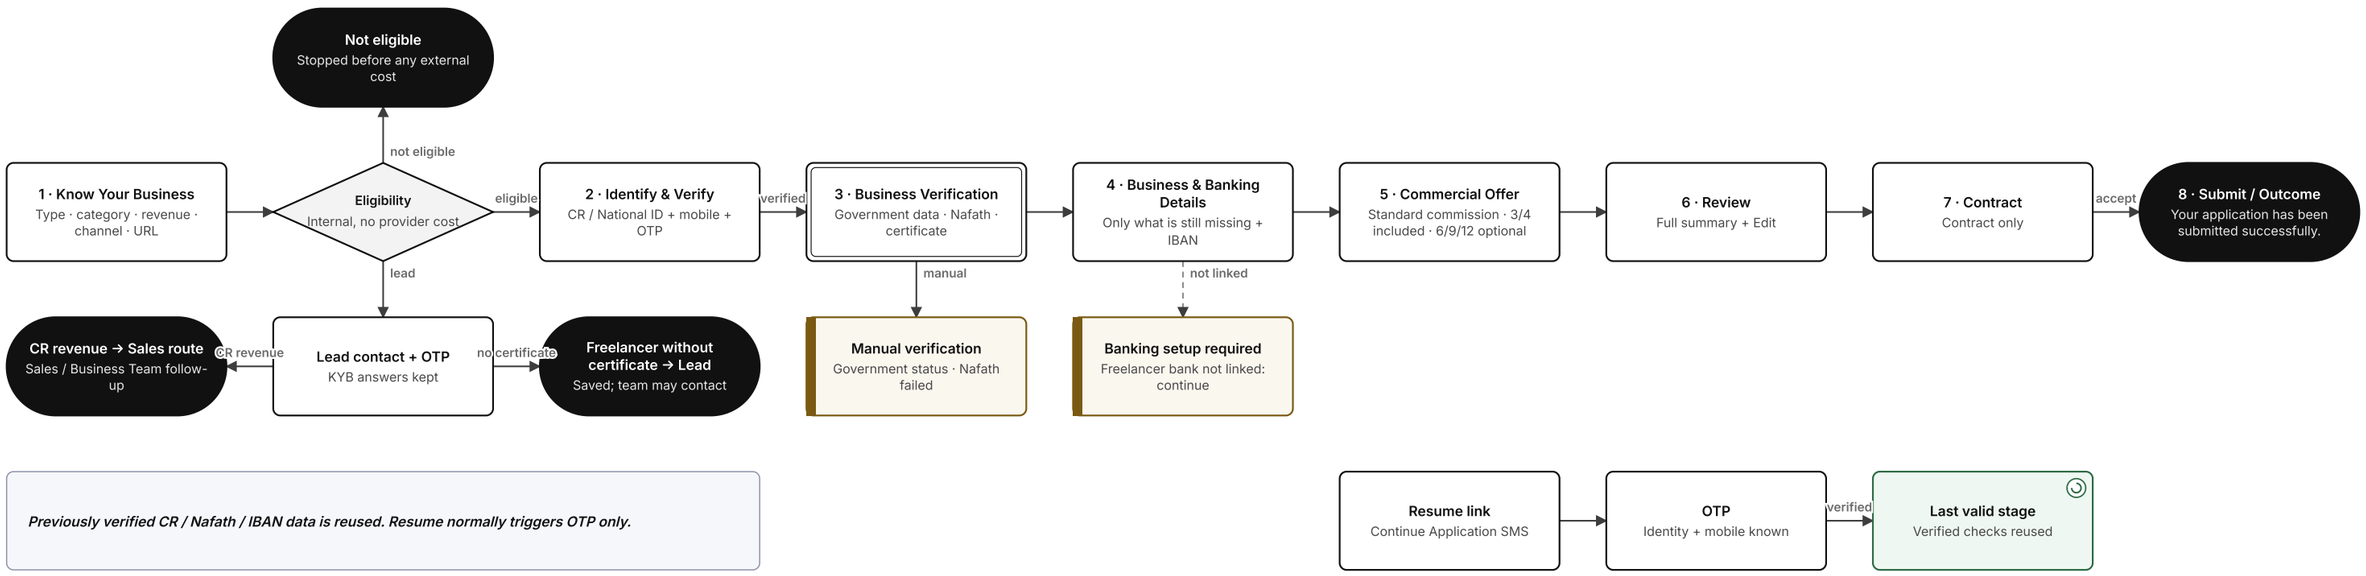

Simple Master Board

Proposed / Product Design

Previously verified CR / Nafath / IBAN data is reused. Resume normally triggers OTP only.

User-facing page · Backend decision · Internal backend step · External provider check · Cached / reused verification · Manual route · Final outcome · Open product / compliance decision

Fallback / reuse / loop

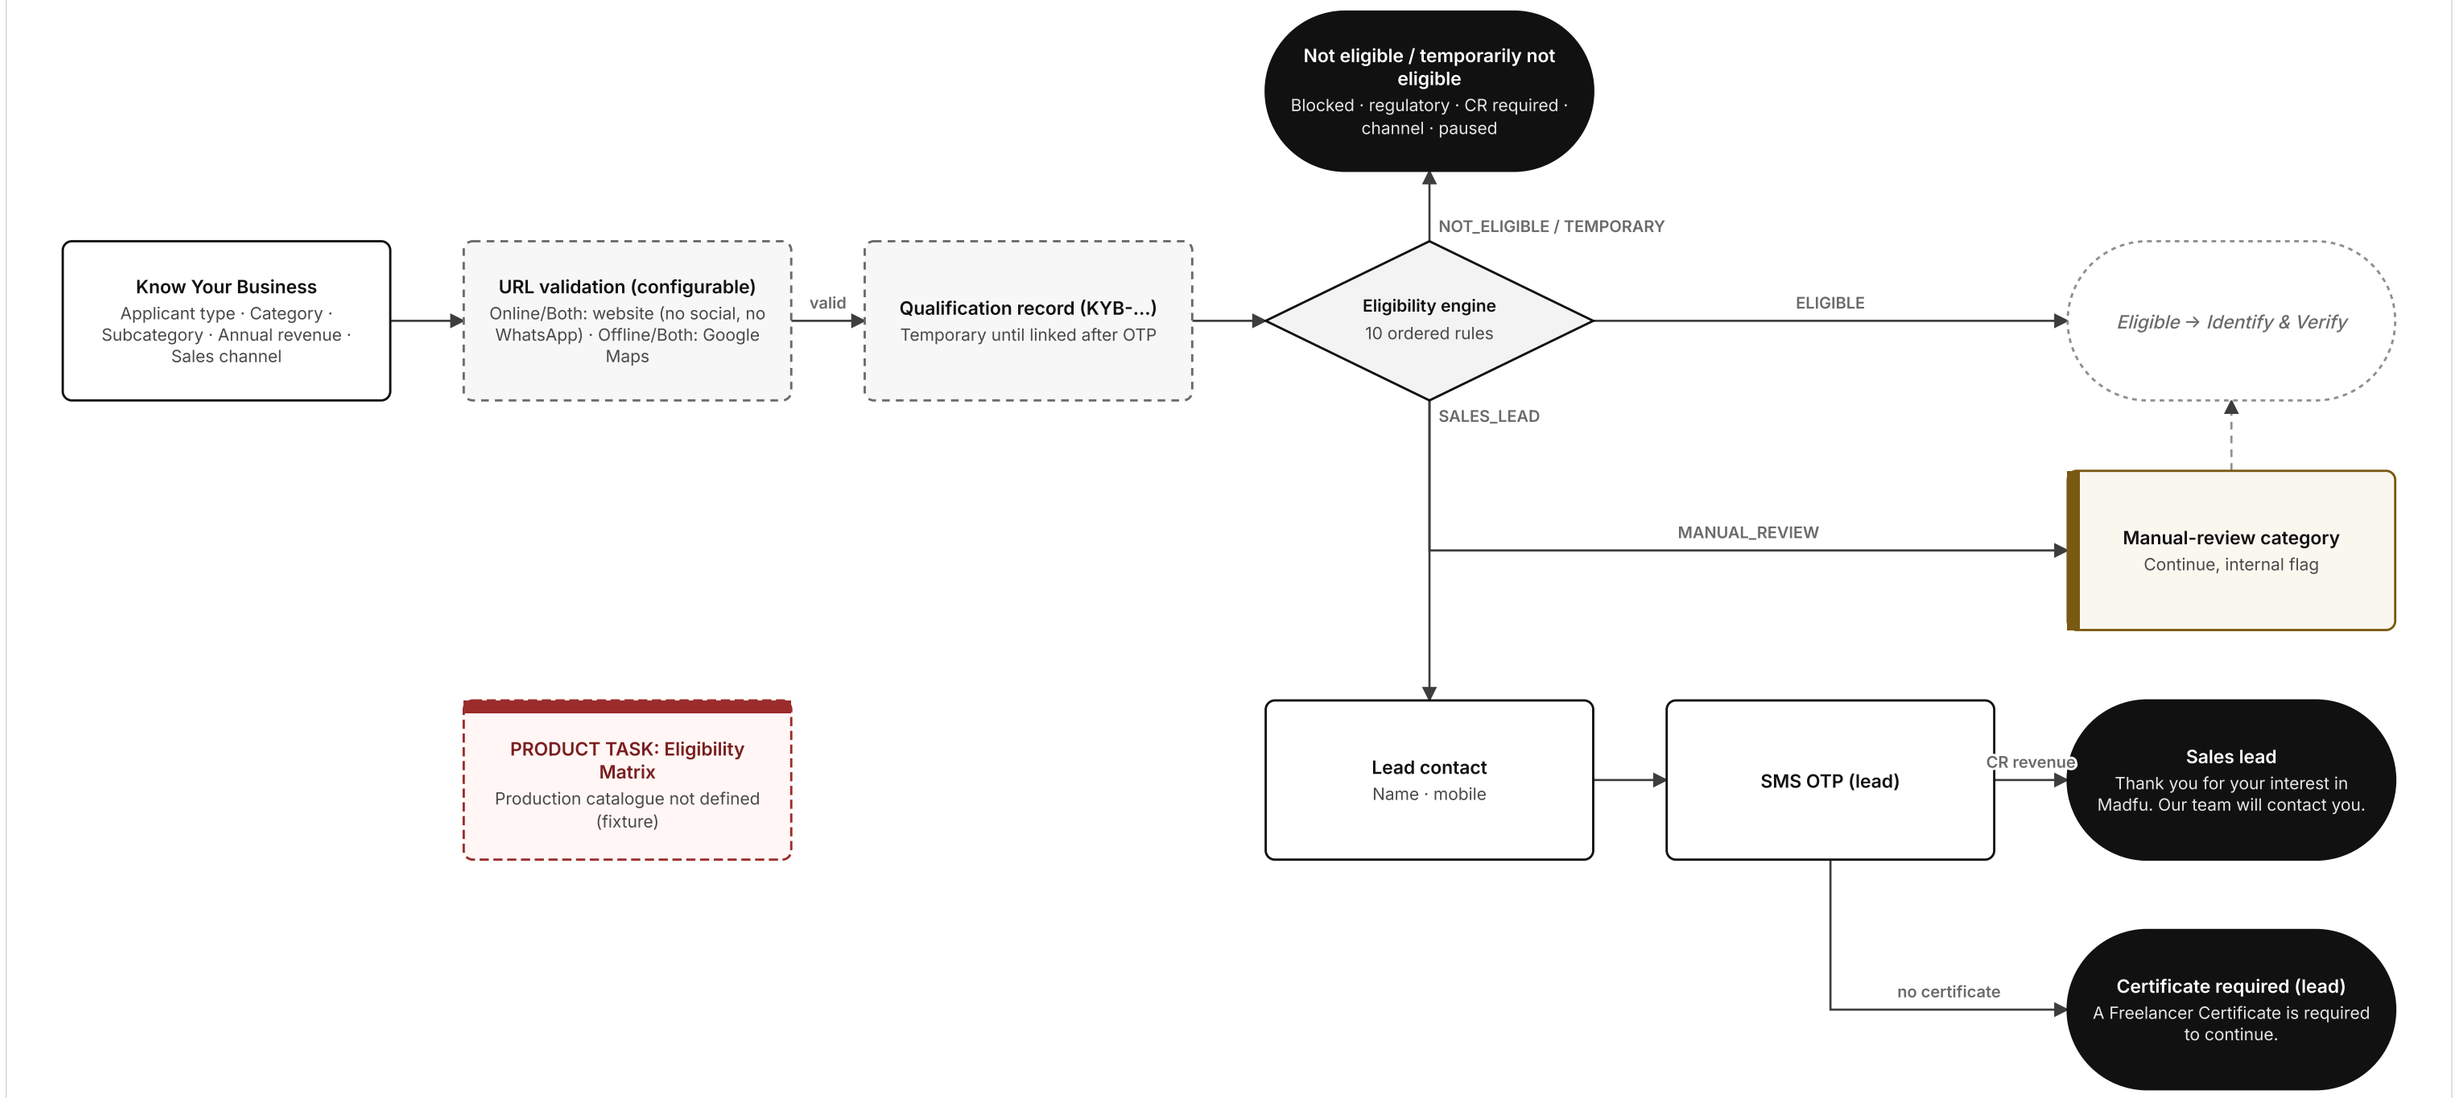

Proposed / Product Design

A · Know Your Business and eligibility

First page. No CR, National ID, mobile or OTP. Eligibility is evaluated internally before any paid verification.

User-facing page · Backend decision · Internal backend step · External provider check · Cached / reused verification · Manual route · Final outcome · Open product / compliance decision

Fallback / reuse / loop

Proposed / Product Design

Know Your Business

The first page. No CR, National ID, mobile or OTP. Eligibility is checked before anything is verified.

Stages

#	Stage	Screens
1	Know Your Business	kyb · lead
2	Identify & Verify	identify · otp
3	Business Verification	cr-verify · persons · nafath · certificates
4	Business & Banking Details	business
5	Commercial Offer	commercial
6	Review	review
7	Contract	contract
8	Submit / Outcome	outcome

Proposed / Product Design

Stage 1 eligibility rules (ordered, KYB-RULES-v3-demo (2026-10-23))

Rule	Condition	Result	Reason code	Type
KYB-R01	Category blocked / restricted for this applicant type	NOT_ELIGIBLE	CATEGORY_NOT_SUPPORTED	business
KYB-R02	Regulatory prohibition for this applicant type	NOT_ELIGIBLE	REGULATORY_RESTRICTION	regulatory
KYB-R03	Activity requires a CR and the applicant is a Freelancer	NOT_ELIGIBLE	ACTIVITY_REQUIRES_CR	regulatory
KYB-R04	Freelancer category allowed online only, applicant sells offline	NOT_ELIGIBLE	CHANNEL_NOT_SUPPORTED	business
KYB-R05	Category temporarily paused	TEMPORARILY_NOT_ELIGIBLE	CATEGORY_PAUSED	business
KYB-R06	Freelancer without a Freelancer Certificate: keep as lead	SALES_LEAD	FL_CERT_REQUIRED	business
KYB-R07	Registered business below SAR 100,000: lead (Business Team rejects under the proposed policy)	SALES_LEAD	REVENUE_BELOW_BAND	business
KYB-R08	Registered business above SAR 20,000,000: Sales lead	SALES_LEAD	REVENUE_ABOVE_BAND	business
KYB-R09	Category needs manual business review: continue, flagged	MANUAL_REVIEW	CATEGORY_MANUAL_REVIEW	internal
KYB-R10	Everything else: eligible for self-onboarding	ELIGIBLE	OK	internal

First matching rule wins. Evaluated internally before any external call. Production Eligibility Matrix: PRODUCT TASK.

Proposed / Product Design

Category rules (synthetic fixture catalogue)

Madfu subcategory	Registered business	Freelancer
Retail & e-commerce › Fashion & accessories	Allowed	Allowed
Retail & e-commerce › Electronics	Allowed	Freelancer online only
Retail & e-commerce › Gold & jewellery (example)	Regulatory prohibition	Requires a CR
Food & beverage › Cafés & coffee	Allowed	Requires a CR
Food & beverage › Home-made food	Allowed	Freelancer online only
Services › Design & creative services	Allowed	Allowed
Services › Photography	Allowed	Allowed
Services › Business consulting	Allowed	Allowed
Fixture examples (demo rules) › Example: restricted category	Blocked / restricted	Blocked / restricted
Fixture examples (demo rules) › Example: manual business review	Manual business review	Manual business review
Fixture examples (demo rules) › Example: temporarily paused	Temporarily paused	Temporarily paused

Example only (e.g. gold & jewellery). Not the production policy catalogue.

Proposed / Product Design

Website and Google Maps validation (configurable)

Field	Accepted	Rejected
Website (Online / Both)	https:// link with a real domain	Social media (instagram.com, facebook.com, fb.com, tiktok.com, x.com…) · WhatsApp (wa.me, whatsapp.com…) · invalid format
Google Maps URL (Offline / Both)	maps.google.com, maps.app.goo.gl, goo.gl, g.page · google.com/maps	Any other host, social links, invalid format

A format check does not prove the applicant owns the website or location.

Proposed / Product Design

Government CR validation (GOV-CR-v3-demo (2026-10-23))

Check	Condition	Action
CR status	ACTIVE	continue
CR status	EXPIRED	manual_review (CR_EXPIRED)
CR status	SUSPENDED	not_eligible (CR_SUSPENDED)
CR status	VIOLATION	manual_review (CR_GOVERNMENT_VIOLATION)
CR age	3 months or less	temporarily_not_eligible (CR_TOO_RECENT)
National Address	Missing / expired	continue + flag
Legal entity	NON_SAUDI	continue + "additional documents required" (collected later)

Only these rules are known. The full Decision & Validation Inventory is a PRODUCT TASK.

Proposed / Product Design

Category ↔ government activity mapping (ACT-MAP-v3-demo (2026-10-23))

Declared subcategory	Government activity	Outcome	Action
Retail & e-commerce › Fashion & accessories	Retail sale of clothing (demo)	MATCH	continue
Retail & e-commerce › Fashion & accessories	General retail trade (demo)	AMBIGUOUS	manual_review
Retail & e-commerce › Fashion & accessories	Retail sale of gold and jewellery (demo)	CONFLICT	clarify
Retail & e-commerce › Electronics	Retail sale of electronic equipment (demo)	MATCH	continue
Retail & e-commerce › Electronics	General retail trade (demo)	COMPATIBLE	continue
Retail & e-commerce › Gold & jewellery (example)	Retail sale of gold and jewellery (demo)	MATCH	continue
Food & beverage › Cafés & coffee	Coffee shops (demo)	MATCH	continue
Food & beverage › Cafés & coffee	Management consultancy (demo)	CONFLICT	clarify
Food & beverage › Home-made food	Home food production (demo)	MATCH	continue
Food & beverage › Home-made food	Coffee shops (demo)	COMPATIBLE	continue
Services › Design & creative services	Specialised design activities (demo)	MATCH	continue
Services › Design & creative services	Photographic activities (demo)	COMPATIBLE	continue
Services › Photography	Photographic activities (demo)	MATCH	continue
Services › Photography	Specialised design activities (demo)	COMPATIBLE	continue
Services › Business consulting	Management consultancy (demo)	MATCH	continue
Fixture examples (demo rules) › Example: manual business review	Management consultancy (demo)	MATCH	continue
Any pair not listed	—	UNMAPPED	manual_review
Registered activity not eligible for the applicant	e.g. gold & jewellery	any	stop

Synthetic fixture. Production mapping: PRODUCT TASK for the Product/Business team.

Proposed / Product Design

Verification reuse (cost rule)

Verification	Depends on	Freshness policy	On ordinary resume
CR data (registry, activities, National Address)	CR identity	Reusable until invalidated	Reused — no new provider call
Associated people	CR identity	Reusable until invalidated	Reused — no new provider call
Nafath	Application + selected verified person / National ID	Reusable until invalidated	Reused — no new provider call
Freelancer Certificate retrieval	Verified National ID	Reusable until invalidated	Reused — no new provider call
IBAN ownership	IBAN + ownership target (business CR, or National ID + certificate)	Reusable until invalidated	Reused — no new provider call

Previously successful external checks are reused until their dependent data changes or an explicit freshness policy invalidates them. Resume normally costs one SMS OTP.

Proposed / Product Design

Edit → what is invalidated

Change	External verifications invalidated	Internal re-evaluation
Website or Google Maps URL	None	Re-validate the URL format only
Sales channel	None	Re-run eligibility (channel rules)
Category / subcategory	None	Re-run eligibility and category ↔ activity reconciliation on the stored activity; re-derive pricing. No external call: the stored CR / certificate activity is reused
Annual revenue	None	Re-run eligibility (revenue routing)
IBAN	IBAN ownership	IBAN verification only
Bank linked to certificate (Freelancer)	IBAN ownership	IBAN verification only
Selected authorised person (before Nafath success)	None	New Nafath context for the new person; attempt counter not reset
Selected authorised person (after Nafath success)	Nafath	Nafath must be repeated for the new person
Selected freelance certificate	IBAN ownership	Re-run reconciliation on the certificate activity. IBAN ownership target includes the certificate
CR number	CR data (registry, activities, National Address), Associated people, Nafath, IBAN ownership	Duplicate check, CR retrieval, people, activity reconciliation, authority (Nafath), IBAN ownership target
National ID (Freelancer)	Nafath, Freelancer Certificate retrieval, IBAN ownership	Duplicate check, Nafath, certificate retrieval, IBAN ownership target
Mobile number	None	New SMS OTP for the new mobile

Proposed / Product Design

Pricing & Commission Matrix (PRICING-v3-demo (2026-10-23), synthetic)

Category / subcategory	Standard (3 + 4 months, included)	6 months (optional)	9 months (optional)	12 months (optional)
retail	7.0%	8.5%	10.0%	11.5%
retail-electronics	6.5%	8.0%	9.5%	11.0%
food	6.0%	7.5%	9.0%	10.5%
services	7.5%	9.0%	10.5%	12.0%
fixture	7.0%	8.5%	10.0%	11.5%

Standard commission never drops because of self-declared revenue. Optional evidence triggers an internal Commercial review; onboarding continues with the standard rate.

Proposed / Product Design

Contract gate (computed from the prototype rule)

Applicant	Situation	Contract
Registered business with a Commercial Registration (CR)	Nafath verified, IBAN verified	Contract available
Registered business with a Commercial Registration (CR)	Nafath verified, IBAN unverified after 2 checks	Contract available
Registered business with a Commercial Registration (CR)	Activity conflict, team to confirm	No contract: manual verification
Registered business with a Commercial Registration (CR)	Nafath failed twice	No contract: manual verification
Freelancer with a Freelancer Certificate	Nafath verified, certificate selected, bank linked	Contract available
Freelancer with a Freelancer Certificate	Nafath verified, bank NOT linked to certificate	Contract available

Freelancer bank-link gate is a rule flag (currently OFF), pending a Compliance decision.

Proposed / Product Design

Outcomes: applicant sees vs internal status

Applicant sees	Internal status
Your application has been submitted successfully.	Submitted · under review
Your application has been submitted.	Submitted · banking setup required
We have received your application.	Manual verification
Thank you for your interest in Madfu. Our team will contact you.	Sales lead · CR above SAR 20M
Thank you for your interest in Madfu. Our team will contact you.	Lead · CR below SAR 100K (Business Team rejects under the proposed policy)
A Freelancer Certificate is required to continue.	Lead · Freelancer certificate required
A Freelancer Certificate is required to continue.	Lead · no active Freelancer certificate found
We can’t onboard this business online at the moment.	Not eligible
We can’t onboard this business yet.	Temporarily not eligible
This business already has a Madfu account.	Existing merchant · no new application
An application already exists for these details.	Duplicate identity · no new application
You declined the contract.	Contract declined · not submitted

Proposed / Product Design

Internal reason codes (never shown as such)

Code	Meaning
OK	No restriction
CATEGORY_NOT_SUPPORTED	Category blocked / restricted
REGULATORY_RESTRICTION	Regulatory prohibition
ACTIVITY_REQUIRES_CR	Activity requires a CR
CHANNEL_NOT_SUPPORTED	Channel not allowed for this applicant type
CATEGORY_PAUSED	Category temporarily paused
CATEGORY_MANUAL_REVIEW	Category needs manual business review
FL_CERT_REQUIRED	Freelancer certificate required
REVENUE_BELOW_BAND	CR revenue below the self-service band
REVENUE_ABOVE_BAND	CR revenue above the self-service band
CR_TOO_RECENT	CR age 3 months or less
CR_EXPIRED	CR expired
CR_SUSPENDED	CR suspended
CR_GOVERNMENT_VIOLATION	Government violation / restriction
ACTIVITY_REGULATED	Registered activity is not eligible (regulated)

Proposed / Product Design

Open product and compliance decisions

Not confirmed rules. Implemented configurably with synthetic values.

---

1. PRODUCT TASK **Define the full Eligibility Matrix** — Category · subcategory · applicant type · sales channel · revenue band · result · CR / certificate required · manual review · regulatory restriction · reason code · rule version.
2. PRODUCT TASK **Define the Pricing & Commission Matrix** — Category · subcategory · merchant / revenue tier · tenure · standard commission · improved / negotiated logic · proof requirement · effective date / version.
3. PRODUCT TASK **Define Category/Subcategory ↔ CR Activity mapping** — MATCH / COMPATIBLE / AMBIGUOUS / CONFLICT / UNMAPPED per pair, and the action for each (continue, manual review, stop, clarification).
4. PRODUCT TASK **Complete the Onboarding Decision & Validation Inventory** — Every rule from merchant input, government CR data, National Address, freelancer data, regulation, Madfu policy, categories, CR activities / age / status, legal entity, nationality, violations, banking, sales channel. Per rule: source, field, condition, type, regulatory / business / internal, stage, blocking, user message, internal status, manual follow-up, external-call cost, version.
5. COMPLIANCE DECISION **Freelancer linked IBAN before contract?** — Can a Freelancer sign the Madfu contract before the required IBAN is linked to the Freelancer Certificate? Prototype rule flag: false (least disruptive: contract allowed, banking follow-up).
6. PRODUCT/COMMERCIAL DECISION **Optional better-pricing documents** — Which documents qualify a merchant for improved pricing. Prototype: neutral "Supporting document" / "Additional supporting document" placeholders, shown only after the merchant says they are interested in a better offer. Contract amendment / repricing after review also open.
7. PRODUCT/ENGINEERING DECISION **Freshness / expiry policy for stored verifications** — CR data, people, Nafath, certificates, IBAN. Prototype: "Reusable until invalidated" (no expiry) for all.
8. PRODUCT / COMPLIANCE DECISION **Mobile ownership vs selected authorized person** NOT IMPLEMENTED — DECISION REQUIRED — Registered business: what should happen if the OTP-verified mobile number is not associated with the National ID of the CR owner / authorized person selected for Nafath? The prototype has no logic for this: it does not block, call a provider, show a message or change Nafath.
   - Is mobile ↔ National ID ownership matching required?
   - At what stage should it be checked?
   - Is it regulatory, risk, or Madfu business policy?
   - Does a mismatch block self-onboarding?
   - Can another owner be selected?
   - Does it route to manual verification?
   - Can Nafath itself provide sufficient identity assurance?
   - Which provider / data source should perform the match?
   - Is the verification paid?
   - Can an existing result be reused on resume?

Other open points

- Exact treatment of SAR 100,000 and SAR 20,000,000 (policy boundary to confirm; prototype: inside the self-service band).
- Government status → action mapping (prototype: expired and violation → manual verification, suspended → not eligible).
- Providers behind CR data, associated people, certificates, IBAN ownership and the contract (prototype: neutral simulated adapters).
- Whether a Nafath technical failure uses one of the 2 attempts (rule flag: false).
- Which additional documents non-Saudi entities need, and when operations collect them.

Proposed / Product Design

Global UX handover note

> All screens require complete UX/UI validation, error-state, empty-state, loading-state, retry, and edge-case designs. The absence of a specific state from the wireframes does not mean it is excluded from the final product requirements. The UX/UI team is responsible for designing comprehensive error and validation experiences for every field, step, and integration.

These wireframes show structure, content and behaviour. Visual design, motion, Arabic / RTL and accessibility are for the UX/UI team to complete.

Assumptions in the prototype

- Know Your Business is the first page: no CR, National ID, mobile or OTP before eligibility.
- Application and merchant account are separate: no login or password during onboarding.
- A Continue link identifies an application; OTP is always required to reopen it.
- Stage-1 answers are never asked again; they are shown with Edit.
- Nafath verifies identity and authority; it is not the contract signature.
- IBAN is the only bank input; bank name is derived. No standard-path document uploads; Freelancers upload nothing.
- Payment plans and commission live in the Commercial Offer; the Contract shows them as contract content only.
- Source of Revenue / Source of Income are not asked.
